Session Synopsis

The number one pain point experienced by nearly every business today: the disconnect between the world of *making* decisions and the world of *executing* them. Today, 9 out of 10 organizations fail to implement their strategy.

The upcoming presentation builds on the information provided in the April, 2011 PMI KPC Monthly Seminar presentation, which focused on learning about Business Intelligence at a high level. Attendance at the last month's seminar is NOT a prerequisite to attend this event.

This session will focus on Business Intelligence (BI) implementation best practices developed by the leading BI consulting firms to help organizations achieve their objectives for deploying BI.

In this presentation you will learn about the successful BI deployment within an enterprise.

The information provided will be useful to consultants, project managers, IT heads and business managers. The audience will get a better understanding of the processes that will help plan, execute, monitor and close an enterprise wide BI implementation project.

Free for PMI KPC Members
Non-PMI-KPC Members Fee Rs: 650/=

Presenter: Mohammed Rafi Khan, PMP
