Session Synopsis

While formal project management processes and practices guides individuals on project management, in the real world where projects are done with multiple stakeholders whose interests vary, negotiation techniques and stakeholder management are critical, especially in cases where you, as a project manager, may have limited authority but extensive responsibility. Here, effective techniques for handling the political environment are critical in helping you to get positive results for the benefit of the Project and Organization,

Benefits of attending the seminar will include the following:

1. **Understand** the role of Politics in Project Management
2. **Learn** techniques of handling Politics
3. **Redefine** project management knowledge
4. **Relate** to your own scenarios
